

Official Inauguration of Ethylene Glycol Plant in the USA

In the presence of Mr. Hashim Hashim, Chief Executive Officer of Kuwait Petroleum Corporation (KPC), Mr. Mutlaq Al-Azmi, Petrochemical Industries Company (PIC) CEO, Ms. Nadia Al Hajji, Deputy CEO for Projects and Business Development, and Dr. Salman Al-Ajmi, Manager of Major Projects, represented the Company in the official inauguration of Ethylene Glycol Plant in the USA. The Project has been delivered by ME Global, a wholly owned subsidiary of EQUATE Petrochemical Company in which PIC owns 42.5%, to be one of the world's largest plants for the production of ethylene glycol with a production capacity of 750,000 metric tons per year.

The Plant is set to produce monoethylene glycol and diethylene glycol materials used for a number of applications, including polyester fibers, plastic bottles and packaging materials made from polyethylene terephthalate, antifreeze and coolant, as well as paints, resins, solvents, heat transfer fluids, and building materials.
